TAMU Pre-Medical Society was incremental in my success as an applicant and as a young professional. Having been an active member for all 4 years of my undergrad experience, PMS offered me so many highly valuable resources for every step of the pre-med process, including how to optimize my success through extracurricular involvement, adopting advanced time management skills, teaching me how to be an effective leader, and so many more. Moreover, being a part of PMS brought me the community of support I needed to make it through the rigorous process of the pre-medical journey.

School: TTUHSC Lubbock

Class: 2025

I'm currently an MD/MPH student at TTUHSC Lubbock, and am about to apply to internal medicine this cycle. The Pre-Med Society gave me a variety of experiences and opportunities. Joining early on allowed me a lot of volunteering opportunities that continued throughout undergrad, and I also quickly was able to

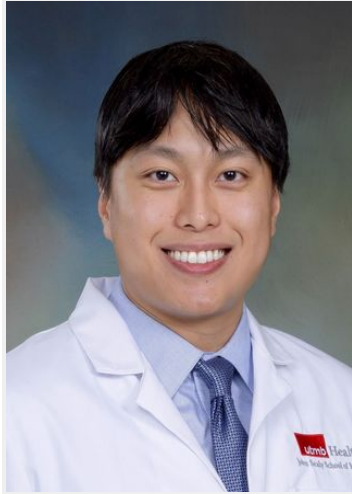

attain leadership positions which helped me grow as a leader and gain exposure to putting on big events for the org. It was also just a lot of fun getting to meet other pre-meds and provide mentorship to those exploring the idea of pre-med.

Tristen Nguyen

School: UTMB School of Medicine

Class: 2027

My time in the Pre-Med Society was crucial in honing my leadership and interpersonal skills, and it also gave me some really memorable experiences with friends. The relationships I was able to build with doctors and the diverse volunteering opportunities I had through the club strengthened my med school application and solidified my commitment to a career in medicine.

School: UTMB John Sealy School of Medicine

Class: 2026

The Pre-Med Society sparked my passion for mentorship through serving as an officer, founding the peer mentorship program, and just having the support in preparing and applying for med school. I've carried that love of mentorship on in my medical school career through mentoring pre-med students, serving as an education chair for underclassman med students, and starting a women's health research org to help others navigate research as a med student.

Barbara Gano

School: McGovern Medical School

Class: 2028

As a first-generation student, the upperclassmen in the Pre-Med Society acted as my mentors and I learned how to navigate my path to medical school with their help. I not only gained a powerful network, but also leadership experience, volunteering in the community, and knowledge of the medical field/application process through our speakers!

Class: 2027

The Pre-Med Society really helped me build up my resume and steered me in the right direction when it came to the application process. I don't think I would be here today without the guidance and friendships made through the Pre-Med Society.

School: Lincoln Memorial University DeBusk College of Osteopathic Medicine

Class: 2027

Being a part of the Pre-Medical Society at A&M was an awesome experience and such a crucial stepping stone for me. I learned not only from practicing physicians but also from my peers about what it truly takes to fulfill this calling into medicine. The society played a significant role in guiding me through the pre-med journey, and it was inspiring to be surrounded by people who shared that same passion. It's fun to look back now and see how far we've all come and where our paths have taken us in our medical endeavors.

Larry Yin

Instagram: @larry_yin

I go to A&M College of Medicine Class of 25, applying internal medicine. The Pre-Med Society helped me the most with showing me the steps I need to take to build my CV, factors to consider when looking at schools, and gave me an environment of like minded individuals. One of the best things I did during undergrad!

Kaylah Pérez

School: Tillman J Fertitta Family College of Medicine, University of Houston

Class: 2026

The premed society gave me the tools to navigate my interest of a career in medicine through their informative meetings. It allowed me to put into perspective what I needed to do and how I needed to perform to make myself the best applicant. Additionally, being on the leadership board gave me the opportunity to see what it was like working in a team and gave me the skill set to pursue other leadership positions in medical school.

Jay Mendenhall

Instagram: @jaymendenhall1

I'm a fourth-year student at McGovern Medical School and currently serving as the President of our Student Ambassador group that runs interview day. Pre-Med Society helped me find valuable leadership and volunteer experiences that were fulfilling during my time in Aggieland and prepared me to apply to medical school. In addition, the guest speakers gave plenty of valuable wisdom that made starting medical school less intimidating. I applied for a pediatrics residency and will find out where I match in March!

Jenna Sturgeon

Hi! My name is Jenna Sturgeon and I am a M2 (class of 2027) at the Texas A&M College of Medicine. Pre-Med Society allowed me to grow as a leader, fostered my passion for medicine through physicians speakers at meetings, and the advisors helped me logistically with the application process. Most importantly, Pre-Med Society gave me a supportive community that understood my goals and what I was going through. I have also found a great community like this at the TAMU COM! :)

Colette Jones

Instagram: @colette.jones

I'm an MS1 at UAB Heersink School of Medicine. I loved being a part of Pre Med Society in undergrad; it provided a supportive community for me to turn to, and the meetings and med school tours gave me a good idea of what I was looking for in my future school

Class of 2026

Pre-Med society was the backbone of my application to medical school. It gave me an opportunity to learn how to plan large events and coordinate different groups of people while dealing with different challenges. This organization is what you make of it. Be involved in volunteering, socials, events, and leadership! It will pay off!

Megan Emiliani

Instagram: @megan_emiliani

Howdy! My name is Megan Emiliani and I'm currently a 2nd year pediatric resident in Austin. I attended Texas A&M College of Medicine, Class of 2023 and I was in Pre-Med Society for all 4 years of college! Pre-Med provided valuable leadership experiences, and it also gave me the information I needed to guide and prepare me to get into medical school. I'll always be grateful for that!

Texas A&M University Naresh K. Vashisht College of Medicine Class of 2029

Howdy! My name is Shaina Gomez, and I am an M1 at Texas A&M College of Medicine. I joined TAMU Pre Medical Society my freshman year, and it played a huge role in my growth throughout this challenging journey. Through the support of my peers and mentors, I was able to get involved in meaningful volunteer work, research, and clinical experiences. This organization helped me grow as a leader and gain confidence in myself. I learned so much from those around me and never felt alone. I was always encouraged and motivated to keep pushing myself to do more.

Jocelyn Ma

Texas A&M University Naresh K. Vashisht College of Medicine Class of 2029

Howdy! My name is Jocelyn Ma and I am a M1 at Texas A&M College of Medicine. I graduated from Texas A&M in 2025 with a degree in Biology and a minor in Public Health. Being the first person in my family to go into medicine, I had absolutely no idea what to expect going into this career path, and Premed Society changed that. Not only did it offer vast resources and opportunities, but it also gave me a community of people and mentors. The connections I have built through this org have gotten me shadowing opportunities, chances to talk to medical students and professors, and so much more. It also allowed me to step into leadership roles and gain valuable experiences that helped me prepare for medical school!

Angela Lubrano

School: UIW School of Osteopathic Medicine

Class: 2030

Getting involved in the Texas A&M Pre-Medical Society allowed me to surround myself with like-minded individuals who encourage growth. I found it to be a healthy environment filled with motivated students who want to help each other succeed! General meetings, volunteering opportunities, intramurals, socials, suture clinics, and everything in between taught me how to manage my time and collaborate with others, all while receiving valuable insight on the medical field. The Pre-Med Society helped me discover my passion for mentoring and grow in my confidence as a medical school applicant. Also, the memories I made with my friends in this organization will last a lifetime!

Michelle Dickey

School: The University of Texas at Austin Dell Medical School

Class: 2030

I will be attending UT Dell Medical School, class of 2030! The Texas A&M Pre-Medical Society was instrumental during my time at A&M and as a pre-med student. I joined the fall of my freshman year, and the society quickly gave me a sense of community that helped me adjust to life in college. The connections I made through the society, both professional and social, will remain important to me for the rest of my life. Also, through the society, I was able to gain access to volunteering and leadership opportunities during all four years, which taught me essential skills and prepared me to be a successful applicant to medical school. Joining early and staying committed helped me affirm my commitment to medicine and build a strong application that showed growth and resilience on the pre-med path.

Elizabeth Ponder

School: Baylor College of Medicine, Temple Campus

Class: 2030

When I first started at Texas A&M, I was not certain what my career would be. Although I had the idea of becoming a physician, it was not cemented until I found the TAMU Pre-Medical Society. My time in the organization gave me opportunities for leadership, growth, and community building among fellow pre-meds. I carry so many amazing memories of the organization with me, including mentoring, field trips, and intramurals. I contribute much of my pre-medical success to this organization, its guidance, and the people who were on the journey with me.

Chiemeka Uwalaka

School: McGovern Medical School at UT Health Houston

Class: 2030

During my 4 years at Texas A&M, being a part of the Pre-Medical Society has been an unforgettable experience. The society is a place where I have grown and been exposed to experiences that I never would have thought possible. It has given me endless opportunities to learn more about the different fields of medicine while giving back to the local community through numerous volunteering opportunities.

Though all of these aspects are amazing, what I truly enjoyed the most about Pre-Med society was the friendships I've established. Being surrounded by like-minded people who support, uplift, and push you to succeed is something I am truly grateful for. TAMU Pre-Med Society has played an instrumental role in shaping who I am today, and as I continue my journey at McGovern Medical School, it will forever have a place in my heart.

School: Texas A&M University Naresh K. Vashisht College of Medicine

Class: 2030

Building a network through the Premed Society was invaluable, especially during MCAT and application season. Having both peers going through the process with me and older students who had just been in my shoes gave me support, advice, and insight I wouldn't have had on my own. Even now as a medical student, I still reach out to older students I met through PMS in undergrad for advice on navigating medical school!
